

During this past year I have grown to hate the changes trying to be implemented by the FCC. Since the fines placed on Howard Stern I have been appauled by the selective prosecution and outrageous restrictions the FCC is trying to get away with. XM is one of the only places I can hear the music, news and information the way I like to hear it UNEDITED! Personally I would do anything to help stop the FCC from ruining any more programing. I thought America was a FREE country, but saddly we only live under the illusion of freedom. The FCC is making a big mistake attacking XM and Howard Stern. More and more people are looking at this new America and thinking of ways to get out. The more freedom you take away from me, the more I will take my money out of this nation and go to a place that appreciates it.

I support XM and Howard Stern. I will tell everyone I know to do everything they can to avoid funding the FCC in any way, in addition I will be voting against Bush and the current administration in efforts to correct the mistakes the FCC continues to force upon us.

Long live AMERICA - Land of the FREE - home of the BRAVE!
